

PERFORMANCE MONITORING FROM ENGIE REFRIGERATION: INCREASE EFFICIENCY IN COOLING AND HEATING IN REAL TIME

Data in, efficiency out: with our Performance Monitoring, we identify deviations in operation before they become critical and translate evaluations into specific recommendations to optimise your chillers and industrial heat pumps. You benefit from consistent cooling and heating performance, reduce costs and increase system uptime.

Your advantages at a glance:

Always efficient

thanks to targeted
optimisation based on
reliable data

Consistently powerful

thanks to real-time
monitoring with
professional evaluation

Operational reliability

thanks to signals from an
early warning system in case
of operational deviations

Competent support

with transparent quarterly
reviews and personal
communication

Performance monitoring: our roadmap
